

Nani's Notebook Digital Files Instructions

The Files

After you download the zip file, you need to unzip the files. If your computer doesn't do this automatically, you'll need to use a program like Winzip or Winrar to unzip the files.

You will need Adobe Acrobat Reader to open the files, as they are in PDF format.

If you need .jpg picture files, please message me and I'll email them to you.

Printing

To print from your computer, be sure to print "Actual Size" and set the print setting to the highest quality. You can print on good quality printer paper, card stock paper or heavy matte paper. I recommend quality matte presentation paper. You may also chose to have the files printed at your local print shop.

Card Making

Trim the prints carefully. Using a paper trimmer is recommended for professional results. Use a high quality glue stick to adhere the print to the front of your blank card and the inside sentiment print to the inside if desired. You may also use double-sided tape. See my post for details on the type of blank cards recommended to use. [How to Make Easy Scripture Greeting Cards](#)

Copyright

These designs are copyrighted by Nani's Notebook. All rights are reserved. Please do not share or sell the prints in whole or in part for any reason. Please do not claim them as your own design. You may print them as many times as you'd like – but only for your own personal use.
